

# DNA Normalizer™

USA patented product

NGS Library and Post PCR Normalization ~ Consistent & Cost Effective

DNA Normalizer™ Kit allows simple and effective DNA purification and concentration normalization via a patented magnetic beads technology. Each reaction of ALINE DNA Normalizer kit can bind and elute up to 100 ng of DNA. Eluted PCR amplicons or DNA libraries can be subsequently pooled and applied to next-generation sequencing.

## Applications

- NGS Library Prep
- Any DNA pooling from various sources

## Advantages

- ↳ Efficient Clean up while Normalization
- ↳ Magnetic Beads-based Kit
- ↳ Genomic DNA and PCR Fragments Friendly
- ↳ Flexible DNA Output
- ↳ Consistent Results
- ↳ Significant Labor and Cost savings

## Ordering Information

Catalog Number	Product Size
N-4001-S	DNA Normalizer 100 rxns
N-4001-M	DNA Normalizer 1,000 rxns
N-4001-Bulk	DNA Normalizer Largest size
